

**THE OXFORD
INSTITUTE
FOR ENERGY
STUDIES**

From 1st October 2016, Dr. Thierry Bros will become a Senior Research Fellow of The Oxford Institute for Energy Studies (OIES), the world leading independent energy institute specialising in advanced research into the economics and politics of international energy.

Thierry Bros was from 2010 to 2016 Senior European Gas and LNG Analyst for Société Générale where he was highly regarded by the energy community, notably accredited as the best European gas analyst in the banking industry for four years in a row (2013-2016). He joined Société Générale in 2007 as a Senior Financial Analyst to provide recommendations on listed pan-European gas stocks and in-depth research on gas issues. From 2002 to 2007, Thierry was a Senior Oil & Gas expert at the French Ministry of Economy, Finance and Industry, where he represented France on oil markets and advised on emergency issues at the International Energy Agency, the European Commission and the Energy Charter. His responsibilities included providing global oil and gas industry reviews to senior French officials and negotiating European directives. As a gas specialist, he reviewed the regulations governing the liberalisation of the French gas market and supervised the Contingency Gas Plan. Prior to that, Thierry worked, for eight years at IFPEN, an oil & gas research institute. Thierry Bros holds a Master of chemical engineering from ESPCI ParisTech and a PhD from Ecole Centrale Paris.

Thierry is the author of the book "After the US Shale Gas revolution" (2012). He is a member of the EU-Russia Gas Advisory Council and an advisor for the World Energy Council - Global Gas Centre. He is also a visiting professor at SciencesPo Paris and a senior expert at Energy Delta Institute. Thierry regularly presents at conferences his research results.

Thierry will strengthen OIES expertise in the Natural Gas Research Programme, which has become one of the foremost sources of independent academic research. Howard Rogers, Director of the OIES Natural Gas Programme, sees Thierry not only adding hugely to the research strength of the OIES Gas Programme, but enhancing its ability to communicate research findings to an international audience.
